TITLE 1980-81 University of Nevada System Student Enrollment Summary.

INSTITUTION Nevada Univ. System, Reno.

PUB DATE [81]

NOTE 37p.

AVAILABLE FROM University of Nevada System, Office of the Chancellor, 405 Marsh Avenue, Reno, NV 89509.

PUB TYPE Statistical Data (110)

EDRS PRICE MF01/PC02 Plus Postage.

DESCRIPTORS College Credits; *College Students; *Community Colleges; Developmental Studies Programs; *Enrollment Trends; Females; *Full Time Equivalency; General Education; *Higher Education; In State Students; Intellectual Disciplines; Majors (Students); Males; Out of State Students; Place of Residence; *State Universities; Student Mobility; Vocational Education

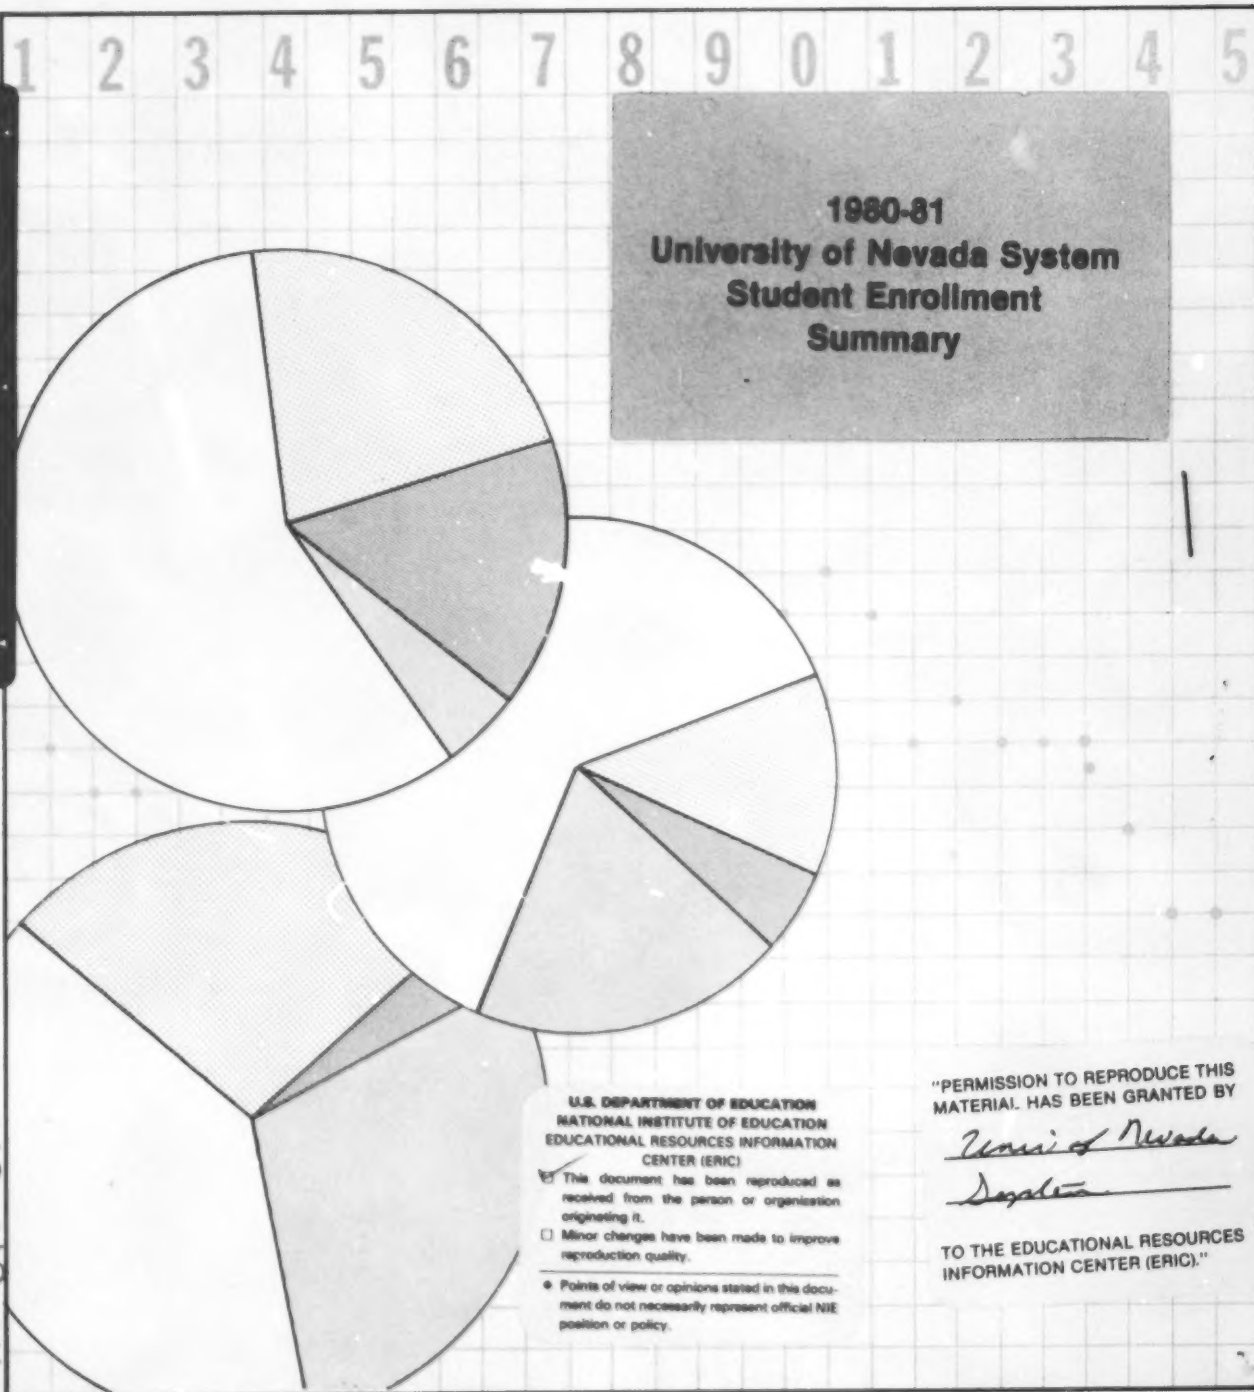

IDENTIFIERS Clark County Community College NV; Northern Nevada Community College; Truckee Meadows Community College NV; *University of Nevada; University of Nevada Las Vegas; University of Nevada Reno; Western Nevada Community College

ABSTRACT

Data on 1980-1981 student enrollments in the University of Nevada system are presented with tables and charts divided into two sections: full-time equated enrollment or credit loads at campuses, and headcount enrollment. The tables report only those course loads or enrollments that are entitled to state funding (private or federally-supported courses and enrollments are omitted). The figures in the tables are net (i.e., withdrawals within the add-drop period have been subtracted from the totals). The figures are also annualized, which means that fall and spring registrations (plus mini-session credits or students) have been totalled and then averaged to show the mean effort of a campus or unit for the year. For the University of Nevada's Reno and Las Vegas campuses, data are presented on credit production by college (subject area) for 1979-1980 and 1980-1981. Data are also presented on credit production for developmental studies, occupational studies, and general education for Clark County Community College, Northern Nevada Community College, Truckee Meadows Community College, and Western Nevada Community College. Headcount enrollments for the universities and community colleges of the state system are presented for the fall semester from 1971-1972 through 1980-1981. Headcount student enrollments are also provided by sex, along with declared major by sex. Resident student enrollment by county is provided for the University of Nevada at Reno and Las Vegas, along with data on in-migrants from out-of-state and from other countries. Lastly, data on 1979-1980 student out-migrants (Nevada residents attending college in other states) are presented. (SW)

University of Nevada System

Enrollment Summary

1980-81

This second edition of a summary of student enrollments in the University of Nevada System has been expanded in the amount of information provided, while being reduced in total bulk. The attempt, as in the first edition, is to provide general information about the system's view of student enrollments without duplicating those matters of student registration that are more specifically oriented to campus use.

Again, tables and charts are divided into two major sections of the Summary: (1) full-time equated students (FTE), and (2) headcount students.

Contents

Preface	ii
FTE/Credit Tables	1
Net Annual FTE Enrollments, 1971-81 Actual	2
Average Credit Load Per Student (Undergraduates)	3
Net Annual Credit Production Charts (All Campuses)	4-9
Headcount Tables	10
Headcount Enrollments (Fall Semester)	11
Headcount by Sex (Table for Each Campus)	12-18
Enrollment by Origin, Charts and Tables	19-22
Out-migrant Information	23-24

Full-Time-Equated Students

FTE/Credit Tables

The tables and graphs that follow report the full-time-equated enrollment, or the credit loads at the campuses of the System. In addition, the tables report only those course loads or enrollments that are entitled to state funding. Private or federally supported courses and enrollments are not shown. The figures in the tables are net, i.e., withdrawals within the add-drop period have been subtracted out from the totals; the figures are also annualized, which means that Fall and Spring registrations (plus mini-session credits or students) have been totaled and then averaged to show the mean effort of a campus or unit for the year.

Headcount Students

Headcount Tables

Headcount enrollments provide the best look at student demographics. Not only do they reveal the number of individuals coming to a campus, but they also help to describe the general profile of the student and inform both administrators and instructors as to the nature of the students with whom they work.

The enrollment data in the following tables are for Fall term only. A particularly large increase or decrease in Spring term enrollment will not be evident from these figures.

Out-migrant Information

The National Center for Educational Statistics (NCES) makes an annual effort at letting individual states know how many college students are leaving the state to get their post-secondary education in other states (out-migrants). A summary of the federal report appears on the following page. The figures report all students who claim Nevada as their legal residence, but who enrolled at a higher education facility outside the boundaries of Nevada in Fall 1979. No data is given for enrollees at colleges and universities in foreign lands. Enrollments at both public and private institutions are included.

A matter of clarification needs to be made with regard to this federal report. These enrollments include the first-time students that appeared in the federal report in last year's Summary. This year, the report includes all enrollments, not just first-time. The federal report includes both full and part-time students. Thus, an employee of the government, or a military person stationed at a U.S. base with the fifty states, but attending college on only a part-time basis, would be counted as one student on the table which follows.

The data in this table are one year older than most of the other enrollment figures in this Summary; users of the Summary should be careful in drawing inferences from this table in relationship to other data in the Summary.
